

N70/6,5

new format offers financial
and environmental benefits

This new format offers financial and aesthetic benefits. At least 10% fewer bricks per m^2 compared to a WV 65 brick and faster construction due to its slim shape. Less mortar and lower transportation costs: a budget-friendly facade! In addition, **N70/6,5** ($\pm 240 \times 70 \times 65$ mm) is suitable for any construction project due to its flexible processing options and choice of 11 colours!

10%
cheaper per m^2
vs. WV 65

THE N70 RANGE

A range that combines price, aesthetics and ecology.

In addition to N70/4 ($\pm 240 \times 70 \times 40$ mm) & N70/5 ($\pm 240 \times 70 \times 50$ mm) the N70/6,5 ($\pm 240 \times 70 \times 65$ mm) is new to the list.

An ecological and above all budget-friendly facade

N70/6,5 ($\pm 240 \times 70 \times 65$ mm) is an exclusive facing brick format, 3 cm narrower and 2,5 cm longer than a traditional WV 65 facing brick.

This special format reduces CO₂ emissions during the production process. Thanks to its slim shape, transportation is also more CO₂-friendly and reduces the required mortar by approx. 30%.

EXCLUSIVE FORMAT

3 cm narrower &
2,5 cm longer (vs. WV 65)

LOWER COST

10% cheaper per m²
vs. WV 65

OPTIMAL TRANSPORT

14% lighter than WV 65 =
14% more bricks per transport

FAST PROCESSING

30% less (adhesive) mortar
10% fewer bricks per m²

LOWER ENERGY BILL

Thinner exterior walls =
additional insulation space

AESTHETIC VERSATILITY

Complements a range
of slim, modern facing bricks.
Can also be processed
in the traditional way.
